

16%-protein, pelleted ration designed to enhance the deer's natural forage diet. The high protein content supports top performance with KEMIN Technology to support optimal antler growth in bucks, reproductive success and abundant milk production in does, and supports optimum growth and healthy development in fawns.

Specifically formulated for what free range deer require to support overall health, reproductive performance and antler growth. The KEMIN nutrient technology is a water resistance process that helps repel moisture and designed to result in reduced waste and labor associated with water damage.

Feature & Benefits.

High palatability

Optimum levels of vitamins and minerals

Supplements poor or sparse forage

Formulation				
ITEM	Inclusion (KG)	%	Protein	FAT
