

# Water fowl

Waterfowl Layer contains biologically available nutrients to enhance breeding and laying performance, egg numbers, fecundity, and chick viability for ornamental waterfowl.

## Features and Benefits

- Exceeds published niacin requirements for waterfowl – Supports healthy growth and development at 150 ppm.
- Nutritionally balanced – Promotes successful breeding and laying programs and requires no mixing or supplementation.
- extruded diet – Allows birds to be fed on the water and prevents accumulation on the bottom of the feeding area, limiting water contamination and waste and creating a more natural feeding environment.

Packaging Type	: PP Bags
Form	: Pellets
Ingredient Profile	: 100% Vegetarian
Grade Standard	: Feed Grade
Product Form	: Pellet Form
Pellet Size	: 5 mm
Product Branding	
Net Weight	: 25 Kgs

**Ingredients** - Ground Corn, Wheat Middlings, Dehulled Soybean Meal, Calcium Carbonate, Fish Meal, Dehydrated Alfalfa Meal, Soybean Oil, Dicalcium Phosphate, Brewers Dried Yeast, Salt, Choline Chloride, Vitamin D3 Supplement, Menadione Sodium Bisulfite Complex (Vitamin K), Vitamin A Supplement, Manganous Oxide, Niacin Supplement, Vitamin E Supplement, Zinc Oxide, Folic Acid, Calcium Pantothenate, Pyridoxine Hydrochloride, Copper Sulfate, Vitamin B12 Supplement, Riboflavin Supplement, Preserved with Mixed Tocopherols, Magnesium Oxide, Thiamine Mononitrate, L-Lysine, DL-Methionine, Citric Acid (a Preservative), Calcium Iodate, Sodium Selenite, Biotin.

# Water fowl

---

**Waterfowl Layer feed is designed to enhance the breeding and laying performance of ornamental waterfowl by providing biologically available nutrients.**

**Here are the key benefits:**

- **Exceeds Niacin Requirements:** With 150 ppm niacin, this feed supports healthy growth and development in waterfowl, exceeding their published niacin requirements.
- **Nutritionally Balanced:** Formulated to promote successful breeding and laying programs, this feed requires no additional mixing or supplementation, ensuring a complete and balanced diet.
- **Extruded Diet:** This feed allows birds to eat naturally on the water surface, preventing feed accumulation at the bottom, reducing water contamination and waste, and creating a more natural feeding environment.
